WHAT YOU NEED TO KNOW

- + I've been working with the Android platform since 2010. I've successfully developed and led multiple consumer-facing, high-rated Play Store apps.
- + I've been a lead developer for years. I've successfully led countless projects involving multiple and varied programming languages, frameworks, and platforms. My development teams are usually 1 to 8 developers.
- + I'm super passionate about excellent application architecture, maintainability, and code quality. I do it for my own sanity; I have the most fun when I'm working in a quality code base.
- + I love keeping up with the latest programming technologies and frameworks. If it's cool, I probably want to work with it.

HIGHLIGHTS

- + My Android Wear app - WeaRSS - was featured as a "Hand-Picked for Wear" app in Google Play. Other good internet coverage as well:

- + Apps on Play Store for which I was lead developer:

- + I implemented a widget layout that was on every new Virgin Mobile phone and box art for a time. It looked pretty much like this:
