## WHAT YOU NEED TO KNOW

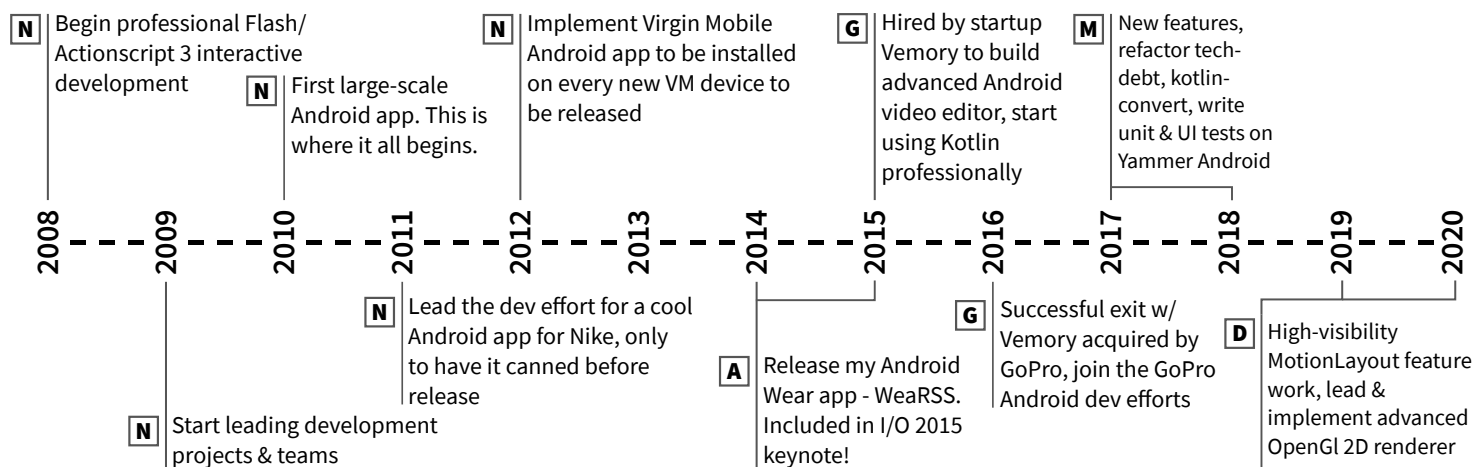

- + I've been working with the Android platform for 10 years. I've successfully developed and led multiple consumer-facing, high-rated Play Store apps.
- + I'm super passionate about excellent application architecture, maintainability, and code quality. I do it for my own sanity; I have the most fun when I'm working in a quality code base.
- + I've been a lead developer for years. I've successfully led countless projects involving multiple and varied programming languages, frameworks, and platforms. My team size was usually 1 to 8 developers.
- + I love keeping up with the latest programming technologies and frameworks, not just in Android dev. If it's cool, I'm probably interested.

## HIGHLIGHTS

- + My work on a MotionLayout-based feature was featured on stage by Google at Android Dev Summit 2019:
